Looking for something with a touch of elegance?

We can special order a large variety of doors, like the ones seen here and many others. Ask your sales representative for more information.
**Taking Measurements For a Door:**

There are many ways to measure for a door replacement, but Elixir recommends you measure your rough opening and select the replacement size which is closest to it.

For example, your rough opening measures 32-1/4" x 76-1/4". ALWAYS BACK DOWN TO THE NEAREST SIZE and order size 32" x 76".

To determine if your door is right or left handed, simply look at it from the outside of the home to see which side the hinges are on.

**Installing the Door:**

1. Make certain all mounting surfaces (siding seams included) are securely fastened and flat around perimeter of door opening.

2. Apply a suitable non-hardening sealant tape (such as Elixir 10-B Mobile Seal) to the backside of the door’s mounting flange.

3. Do not remove any shipping clips or fasteners and keep the door closed and locked during the installation. Opening the door prior to the installation will destroy the pre-squaring by the manufacturer.

4. Insert the door assembly carefully into the rough opening. Make certain the door sill is secure on the floor. Move door to hinge side until it is firmly against hinge side stud.

5. Proceed to fasten door with screws. Drive the first 3 screws into the outer frame in the middle at the hinge side. Then, drive the next 3 screws in the middle of the outer frame on the lock side. Then, secure the balance of the hinge side, across the sill, up the lock side and the header.

6. Remove the shipping clips and open the door. Install the appropriate hardware.

7. If it is a house-type door with storm door, make certain 2 long screws are put through the storm door plunger bracket fastened to the jamb. This is to anchor the bracket securely to your hinge side stud.

8. If the house-type inner door is secured to the outer frame with butt type hinges (steel six-panel door only), run one long screw through each hinge on the jamb side to penetrate the hinge side stud.

9. The house-type door has an adjustable stop. Adjust the stop to the exterior of the inner door to insure a good seal.

If the above steps are followed, the door will be sealed and operate properly.
### Series 9000 Vinyl Steel Combo Door - Six Panel Style

**Door Features:**

**Vinyl Laminated Galvanized Steel**
- Our Thickest Gauge of Long Lasting Steel
- Upgrade from Series 8000 Steel

**Double Seal**
- Folded Steel Edge with Weather Stripping
- Lifetime Warranty Weather-Stripping
- Protects Against Air, Light and Water
- Easy Installation

**Polyurethane Foam Core**
- Highly Energy Efficient R-Values

**Quality Wood Jambs**
- Finger Jointed Solid Pine

**Three-Finger Vinyl Sweep**

**Factory Installed Swivel Latch Bolt**

Doors with windows below are drilled for deadbolt. All other stocked 6 panel doors have knocker, viewer and drilled for a dead bolt.

for Storm Door Locks

Fits most rectangular pushbutton storm doors. Furnished with calibrated metal spindle and spring.

0291305 Black; 10/Ctn.

Heavy-gauge, hollow, aluminum door frame, reinforced with 14-gauge corner gussets. Fiberglass screen resists impact without permanent deformation.

Sliding window tested in 2,500 uses without failure (equivalent to more than 20 years of normal use).

1/8" tempered safety glass installed in all standard size doors.

All storm doors pictured are right-hand doors.
Sliding Glass Patio Doors by Kimro

Vinyl 72" x 76"

- Attractive low profile multi-chambered frame increases viewing area and improves thermal and sound insulating value.
- Standard Frame for use with lap siding. Lap Frame with integral siding pocket that eliminates the need for additional siding trim pieces.
- Heat fusion welded frame and moving panel provides superior structural strength and prevents potential leakage at the corners.
- Staggered internal weep system allows minimum dust infiltration. Snap-in weep covers are standard.

• 3/4 inch sealed insulating glass (tempered) with "intercept" spacer and optional Low-E provides optimum thermal performance.
• Color coordinated attractive mortise type keyed lock mounted on steel reinforced lock jamb for strength and sturdiness that provides added security. Lock keeper is adjustable.
• Easy to reverse the door from XO to OX or OX to XO. Reversing must be done prior to installation.

1-3/8” Interior Doors

Six-Panel Masonite Molded Doors:
The Masonite Molded Panel Series is the industry benchmark for all composite wood doors. This series utilizes a composite wood construction that results in a more durable door that resists warping, shrinking, and cracking better than a solid wood door. In harvest oak or classic white. Uses non-mortise hinges.

Standard Doors:
The Masonite® Veneer Flush interior door offers the visual beauty and refinement of natural wood doors at a value price. These doors are available as hollow core or solid core for the weight and feel of solid wood. Veneer Flush doors are both stainable or paintable.
